React Element

- Smallest building blocks of React apps

```
const element = <h1 className="App-title">Welcome to React</h1>;
```

- Plain JS objects that are
 - Cheap to create
- Components are “made of” elements

```
class App extends Component { . . . }
```

Rendering to the DOM

- Rendered using ReactDOM. See index.js

```
ReactDOM.render(<App />, document.getElementById('root'));
```

- Where is it rendered? See index.html

```
<div id="root"></div>
```

- Root DOM node
